Wyo Visual Basic Name -
Ch. 6 Worksheet #2

1. Write a general procedure named `ChangeBack` that is passed an integer parameter. If the integer's value is 1, the procedure should change the background color of the form (`frmMain`) to green. Otherwise, the background color should change to red.

2. Write a general procedure named `BeepIfEven` that is passed an integer parameter. If the integer is an even number the procedure should beep.

3. Write a general procedure that moves a label that is passed as a parameter ten twips (or pixels) to the left. Use the procedure header

```
Private Sub MoveLeft(lblLabel As Label)
```
