Java   Partner Names -
Ch 14 Exceptions

With your partner, take turns with one person formally describing a type of exception that we studied in
this unit. The other partner must create a code segment that illustrates the exception. If necessary write
client code and code from a class or static method. Both partners must review each others work & discuss
any necessary corrections or improvements.

Exception #1 –

Code Segment –

Exception #2 –

Code Segment –

Exception #3 –

Code Segment –

Continue on the back of the paper and stapling additional paper if necessary.
