

Answer the following questions using the AP Computer Science A Quick Reference (possibly found at http://www.minich.com/education/wyo/java/apexam/quick_reference_2014-15.pdf but also linked from our Java class home page)

- 1) What is `Integer.MIN_VALUE` according to the comments?
- 2) In the following code, roughly how many loop iterations would occur with this loop?

```
for (int i = 0; i > Integer.MIN_VALUE; i++)  
{  
    // stuff happens here  
}
```

- 3) List the 3 methods in the `String` class.
- 4) Explain the 3 possible values that the `compareTo` method returns.
- 5) List 3 methods of the `ArrayList` class (or the `List` interface).
- 6) What does the `Math.random()` method return?
- 7) Explain why the `add` method is listed twice under the `List` interface.
- 8) What is the return type of the `toString` method?
