

Write the following SQL statements with regard to attached table (from http://www.w3schools.com/sql/sql_tryit.asp).

1. all company names
2. all company names and addresses
3. all contact names that start with the letters M – Z.
4. all company names of records where the city is London
5. all company names and addresses
6. all contact names in descending alphabetical order
7. the first 5 complete records
8. all company names where the contact name starts with the letter S
9. all company names where the contact name starts with a letter before J in the alphabet or where the contact name starts with a letter between S and W (including S and W)
10. all addresses that contain the letters "Str"
11. all addresses that contain the word "Oak"
12. insert a record with company name of "Microsoft", a contact name of "Bill Gates", an address of "123 Windows St." and a city of "Seattle".
13. delete all records where the city is "London"

Type 5 more interesting exercises like the ones above into a worksheet with the same heading as this one and print the answers and your name on the back of the paper.
