

Next to each line in the Load method, write the output. Use the margins to trace the code.

```
Public Class Form1
    Dim mintNums() As Integer = {1, 2, 3, 4, 5, 6, 7, 8, 9, 10}

    Private Sub Form1_Load(. . .) . . .
        TextBox1.Text = LeftShift(mintNums)      1. _____
        TextBox2.Text = LeftCirc(mintNums)       2. _____
        TextBox3.Text = RightShift(mintNums)     3. _____
        TextBox4.Text = RightCirc(mintNums)      4. _____

    End Sub

    Private Function LeftShift(ByVal intNums() As Integer) As Integer
        Dim intOff As Integer = intNums(0)
        For J As Integer = 1 To intNums.Length() - 1
            intNums(J - 1) = intNums(J)
        Next
        intNums(intNums.Length() - 1) = 0
        Return intOff
    End Function

    Private Function LeftCirc(ByVal intNums() As Integer) As Integer
        Dim intOff As Integer = intNums(0)
        For J As Integer = 1 To intNums.Length() - 1
            intNums(J - 1) = intNums(J)
        Next
        intNums(intNums.Length() - 1) = intOff
        Return intOff
    End Function

    Private Function RightShift(ByVal intNums() As Integer) As Integer
        Dim intOff As Integer = intNums(intNums.Length() - 1)
        For J As Integer = intNums.Length() - 1 To 1
            intNums(J) = intNums(J - 1)
        Next
        intNums(0) = 0
        Return intOff
    End Function
```

Write a function named RightCirc that follows the pattern illustrated by the functions above and then answer #4 above.

```
Private Function RightCirc(ByVal intNums() As Integer) As Integer
```
