Visual Basic Name –
Writing Methods Worksheet #1

You do not have to write the code that goes inside the parentheses on the first line of each method.

1. Write a complete method named `btnExit_Click` that ends a program.

2. Write a complete method named `btnClear_Click` that clears two labels named `lblName` and `lblSchool`.

3. Write a complete method that causes a message box with the phrase “Hello” to appear when someone clicks a button named `btnStart`.

4. Write a method that causes whatever string is stored in a textbox named `txtInput` to show up in a label named `lblOutput` when a button named `btnDisplay` is clicked.

5. Write a method that causes a message box with the phrase “Hello Saturn” to appear as soon as a program is executed. You can assume that the form is named `Form1`.
